General Information

Journal references in Mathematical Reviews (MR) appear in the following form: *J. Utopian Math. Soc.* (6) **5(56)** (1995/96), *no.* 2, 18–53 (1997), where, after the abbreviated title, one has: (series number) volume number(volume number in first series, if given) (nominal date), issue number if given, first page–last page (imprint date). If only one date is given, it is the nominal date and follows the volume number. If no volume number is given, the year is used in its place. The symbol ★ precedes the title of a book or other item that is being reviewed as a whole; the symbol Ⓥ precedes the title of a videocassette. If an issue of a journal is to be reviewed as a whole and an ad hoc title is devised for this purpose then this title appears in braces { }. Articles that have been accepted for publication in certain important journals are now reviewed in MR from the final manuscript; the symbol ○ at the end of a review denotes such an item.

References to reviews in Mathematical Reviews before Volume 20 (1959) are by volume, page number and position on the page (e.g., MR **15**, 122c); from Volume 20 to Volume 58 (1979), by volume and review number (e.g., MR **20** #4185); from 1980 on, by issue and review number (e.g., MR 80a:46017). References to reviews in Jahrbuch über die Fortschritte der Mathematik are by volume, page number and position on the page (e.g., JFM 24.0048.02). References to reviews in Zentralblatt für Mathematik before Volume 218 (1972) are by volume, page number and position (last two digits) on the page (e.g., Zbl 047.06904); from Volume 218 on by volume and review number (e.g., Zbl 218.46017). References to reviews in Applied Mechanics Reviews, Computer & Control Abstracts, Physics Abstracts, Referativnyĭ Zhurnal Matematika (Mekhanika, etc.) or Statistical Theory and Method Abstracts are prefixed by AMR, CCA, PA, RZhMat (RZhMekh, etc.) or STMA respectively. Reviews reprinted from Zentralblatt für Mathematik are identified by the Zbl review number in parentheses following the reviewer's name.

Authors' names are given as listed in the item being reviewed. In order to identify each author uniquely, MR has assigned to certain authors' names an identifying form of the name. Superscript numbers are used in identifying forms where necessary. The identifying form is added in brackets following the published name.

Most review headings include institution codes. An institution code, indicating the author's address as listed in the reviewed item, consists of two [or three] parts separated by hyphens (e.g., 1-MR [or F-LYON-P]); these parts designate the country, the university or institution [and the department]. The absence of a department code usually indicates Department of Mathematics. Institution codes are also used to indicate the reviewer location for some reviewers. A list of codes appears in the most recent Annual Index of Mathematical Reviews.

Editorial Office: MR is a publication of the American Mathematical Society; it is edited at the University of Michigan in Ann Arbor. All editorial correspondence should be addressed to Mathematical Reviews, 416 Fourth Street, PO Box 8604, Ann Arbor, MI 48107-8604, USA; it may also be sent electronically via Internet to MATHREV@AMS.ORG or by FAX to (313) 996-2916. All other correspondence should be addressed to the American Mathematical Society, PO Box 6248, Providence, RI 02940-6248, USA. Orders should be addressed to the American Mathematical Society, PO Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.*

Subscription information: Beginning with the subscription year 1994, there is a new pricing scheme for products derived from the Mathematical Reviews database, including MR. The list price for a 1997 subscription to MR, including the annual index, is $5,570 = $5,200 (Data Access Fee) + $370 (Product Delivery Fee for MR paper or microfiche). For Institutional or Corporate Members it is $4,530 = $4,160 (Data Access Fee) + $370 (Product Delivery Fee for MR paper or microfiche). Sites which have paid the Data Access Fee can obtain additional subscriptions to MR for $370 each. Individuals who are affiliated with a site which has paid the Data Access Fee can subscribe to MR for $370. Subscribers to paper MR outside the United States and India must pay a postage surcharge of $80. Subscribers to paper MR in India must pay a postage surcharge of $153. Expedited delivery to destinations in North America is $138; elsewhere $379.

Back volumes information: Back issues are available for all volumes of MR; price information can be obtained from the American Mathematical Society, PO Box 6248, Providence, RI 02940-6248. Back volumes are also available in microform from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106-1346.

Cumulative indexes: There are sets of cumulative author and subject indexes that cover the entire span of MR from 1940–1984.

For additional subscription information and information about other products derived from the MR database, contact: Membership and Customer Service, American Mathematical Society, PO Box 6248, Providence, RI 02940-6248; electronic mail = CUST-SERV@MATH.AMS.ORG; FAX = (401) 331-3842.

Mathematical Reviews (USPS 333-940) is published monthly plus, in December, an annual author and subject index issue, by the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213. Periodicals postage paid at Providence, RI, and additional mailing offices. Postmaster: Send address changes to Mathematical Reviews, American Mathematical Society, PO Box 6248, Providence, RI 02940-6248.

PREFACE

This annual index of Mathematical Reviews (MR) is included with each subscription and is also available separately. It is also called Volume 29 of the Index of Mathematical Papers (IMP). Volumes 6–9 of IMP are the annual indexes of MR for the years 1974–77 and are available as a set. The 1978 annual index was the first to be included with each subscription. There are cumulative author indexes to MR that cover 1940–59 (Vols. 1–20), 1960–64 (Vols. 21–28) and 1965–72 (Vols. 29–44), subject indexes for 1940–58 (Vols. 1–19) and 1959–72 (Vols. 20–44), and author and subject indexes for 1973–79 (Vols. 45–58) and 1980–84.

The classification scheme used in the present index is the 1991 Mathematics Subject Classification (MSC). A copy of the 1991 MSC is printed in the back of the subject portion of this index.

The entries in the author, key and subject indexes are comprised of all items reviewed in MR during a given year and some items which will not be reviewed by MR but which have appeared in Current Mathematical Publications (CMP). A star (★) preceding a title indicates a book or other item that is reviewed as a whole. The symbol Ⓥ preceding a title indicates that the item is a videocassette.

Author index; separate key index

The entries in the author and key indexes give full bibliographic information. These entries are accompanied by review numbers {if available} and classification numbers; secondary classification numbers are given in parentheses. Entries are listed alphabetically by author; entries having several authors are listed in full under each author. Surnames consisting of more than one part (e.g., del Olmo, van der Mee) are listed under the first capital letter. Collections of papers, proceedings, bibliographies, tables, etc. that are edited rather than authored are listed in the key index by title and by "key entry". For example, the publication entitled *Categorical topology* is listed under **Categorical topology** and is also listed under **Conference: Categorical Topology** and under the location of the conference. Some monographic series (e.g., American Mathematical Society Translations, Series 2) have entries under the series title in this index.

Arrangement of entries in the author and key indexes

For a given heading (i.e., the primary name of an author, or a title), full entries are listed in order of nominal publication dates; the cross-references are in MR number order after the full entries. The arrangement of each entry is the same as in the heading of its review in MR. The general form for entries is as follows:

Books, Monographs. (Coauthors {if necessary}) ★Title. (Language of original {if necessary}. Summary languages {if necessary}) [English translation of title {if necessary}] Miscellaneous information {edition, editors, translators, series, etc.}. Publisher, city, date. Pagination. ISBN. (Reviewer's name) Review number {if available} Primary classification (Secondary classifications {if necessary}).

Journal article. (Coauthors {if necessary}) Title of article {in English translation if the original title is not in English, French or German}. (Language of original {if necessary}. Summary languages {if necessary}) [English translation of title {if necessary}] Journal abbreviation {including series number if necessary} Volume number(volume number in first series {if given}) (nominal date), issue number {if necessary}, pagination (imprint date). (Reviewer's name) Review number {if available} Primary classification (Secondary classifications {if necessary}).

The first three digits of the review number of an item refer to the MR issue in which the review is published and the last five digits refer to its position within that issue. The first two digits after the colon are the general subject classification of the item.

The phrase "EA 97m" after an MR number indicates that an MR erratum or addendum to the review appears at the end of the 97m issue.

Subject index

The entries in the subject index are arranged in classification order. For a given classification, all entries with that classification as a primary appear first, with authored entries appearing before unauthored entries. These are followed by entries with that classification as a secondary. Again, authored entries appear before unauthored entries. Each section under a given classification is arranged in alphabetical order. For each entry, the author(s), title, language, translated title {if necessary} and the review number {if available} appear at the first author only. The entries for subsequent authors are cross-references to the first author. Complete bibliographic information is available in the annual author and key indexes as well as in the MR review.

Cross-references

There are four kinds of cross-references in these indexes:

Name variations. An author's preferred name is the variation of the name that MR has chosen on the basis of frequency and currency of usage. Items by a given author are usually listed under the author's preferred name. In the author index, cross-references to the preferred form are given from sufficiently distinct alternative forms of the author's name.

Authors in other capacities. In the author index, the names of persons associated with an item in a capacity other than that of author (e.g., editor, translator, subject of a biography, etc.) are also listed. In the subject index, such names appear in parentheses. In both indexes these items occur only as cross-references to complete listings.

Key entries. Cross-references for such entries as bibliographies, obituaries and references to special events are made to the authors of the papers in which these items appear, e.g. **Bibliography: Newman, Morris** *see* **Goldberg, Moshe, 97k:01031**.

Unreviewed entries. Some entries in these indexes have not been reviewed in MR (e.g., items that do not appear to be in final form, or that are at the fringes of MR's scope) although they have been listed in CMP. Unreviewed items appear in the author, key and subject indexes in a format similar to that of reviewed items. For unreviewed items that are part of a collection, the review number in parentheses is a cross-reference to the table-of-contents review, i.e. (see 97x:xxxxx) or (97x:xxxxx). For unreviewed items that are not part of a collection, there is no review number cross-reference.

Transliteration

Since 1983, MR has used the Cyrillic transliteration in use by ANSI, LC, Zbl, ISI, and others. This is also the system used throughout this index. A Cyrillic transliteration table appears at the end of the author/key index.

Names of Chinese authors

The name of a Chinese author appears in the index in Western form. For example, Chen Hong Bin will be listed as Chen, Hong Bin, as though the author's name were Hong Bin Chen. The pinyin transliteration is used for mainland Chinese authors and the Wade-Giles transliteration is used for Taiwanese authors.

In an undertaking of this size, errors are inevitable, despite elaborate precautions and checks. The editors of Mathematical Reviews would be very glad to have their attention drawn to errors in this index and also in the earlier indexes.

Mathematical Reviews

Issue year 1997, annual index **Author Index** **Pages 1–1712**

–A–

Aab, Michael (*with* Rosenberger, Gerhard) Subgroup separable free products with cyclic amalgamation. (English summary) *Results Math.* **28** (1995), *no.* 3-4, 185–194. (From the introduction) **97g:20026** 20E06 (20E07, 57M07)

(Summary) **97e:35151** 35Q53 (14H45, 34L40)

— Modulational instability stabilization via complex Whitham deformations: nonlinear Schrödinger equation. (English and Russian summaries) *Zap. Nauchn. Sem. S.-Peterburg. Otdel. Mat. Inst. Steklov. (POMI)* **215** (1994), *Differentsial'naya Geom.*

Gruppy Li i Mekh. 14, 65–76, 310; *reprinted in J. Math. Sci. (New York)* **85** (1997), *no.* 1, 1596–1604. (Yun Bo Zeng) **97a:35213** 35Q55 (35B35)

— Complex deformations of Riemann surfaces, frequency maps and instability problems. *Algebraic and geometric methods in mathematical physics (Kaciveli, 1993)*, 389–393, *Math. Phys. Stud.*, 19, *Kluwer Acad. Publ., Dordrecht*, 1996. (Iskander A. Taimanov) **97f:32016** 32G05 (35Q55, 58F07)

— On the nondegeneracy of amplitude-frequency modulation for finite-gap solutions of integrable nonlinear equations. (Russian. Russian summary) *Mat. Zametki* **59** (1996), *no.* 1, 53–61, 158; *translation in Math. Notes* **59** (1996), *no.* 1-2, 39–44. (J. S. Joel) **97c:58062** 58F07 (14H99, 35Q53, 35Q55)

— The frequency map for the integrable nonlinear Schrödinger equation and geometry of zeros of abelian differentials. (English summary) *Russian J. Math. Phys.* **4** (1996), *no.* 1, 3–12. (Iskander A. Taimanov) **97h:58087** 58F07 (14H42, 35Q55)

— *see also* **Bobenko, A. I. et al., 97k:01025**

Bikchantaev, I. A. The Riemann problem with a degenerate coefficient on a Riemann surface. (Russian) *Izv. Vyssh. Uchebn. Zaved. Mat.* **1996,** *no.* 6, 3–4; *translation in Russian Math. (Iz. VUZ)* **40** (1996), *no.* 6, 1–2. (Yuri I. Cherskiĭ) **97k:30051** 30E25

Bikhchandani, Sushil (*with* Sharma, Sunil) Optimal search with learning. (English summary) *J. Econom. Dynam. Control* **20** (1996), *no.* 1-3, 333–359. (Bruno Betrò) **97k:60120** 60G40 (62A15, 90A05, 90B50)

Biktashev, V. N. (*with* Holden, A. V.; Zhang, Henggui) Tension of organizing filaments of scroll waves. (English summary) *Philos. Trans. Roy. Soc. London Ser. A* **347** (1994), *no.* 1685, 611–630. (Murad Brutyan) **97h:35218** 35Q72 (76C99, 92B05)

Bil, Adam (*with* Tabor, Józef) On the stability of the Pexider and the Gauss-Pexider equations. (English and Polish summaries) *Opuscula Math. No.* 15 (1995), 5, 19, 39–44. (Wei Nian Zhang) **97b:39046** 39B52

Bil, Robert (*with* Blessenohl, Dieter) Elementare Abschätzungen für das kleinste gemeinsame Vielfache. (German summary) [Elementary estimates for the least common multiple] *Elem. Math.* **51** (1996), *no.* 3, 117–124. (Andreas Guthmann) **97f:11098** 11N05 (11A41)

Bilă, N. (*with* Udrişte, Constantin; Bucur, Constantin M.) Les caractéristiques du groupe linéaire général. (English, French and Romanian summaries) [The characteristics of the general linear group] Proceedings of the International Workshop on Differential Geometry and its Applications (Bucharest, 1993). *Politehn. Univ. Bucharest Sci. Bull. Ser. A Appl. Math. Phys.* **55** (1993), *no.* 3-4, 267–271. (*see* **97e:53002**) 20G20

Bilal, Adel (*with* Ferrari, Frank) The strong-coupling spectrum of the Seiberg-Witten theory. (English summary) *Nuclear Phys. B* **469** (1996), *no.* 3, 387–402. (C. Gauthier) **97j:81347** 81T60 (81T13)

— Consistent string backgrounds and completely integrable 2D field theories. (English summary) Recent developments in statistical mechanics and quantum field theory (Trieste, 1995). *Nuclear Phys. B Proc. Suppl.* **45A** (1996), 105–111. (Summary) **97c:81138** 81T30 (81R10, 81T17)

Bilalov, B. T. On the basis property of the system $\{e^{i\pi nx}\sin \pi x\}_1^\infty$ and of a system of exponentials with shift. (Russian) *Dokl. Akad. Nauk* **345** (1995), *no.* 2, 151–152. (Kazaros Kazarian) **97e:42009** 42C30 (42A65)

Bilbao Arrese, J. M. (*with* López Vázquez, Jorge) Hart and Mas-Colell potential for values of graph-restricted games. (Spanish. English and Spanish summaries) *Qüestiió* (2) **20** (1996), *no.* 1, 71–86. 90D12 (90A14)

Bilbao Terol, Amelia (*with* Arenas Parra, M. Mar; Rodriguez Uria, M. Victoria; Jiménez, Mariano) A fuzzy solution approach to a fuzzy linear goal programming problem. (English summary) *Multiple criteria decision making (Hagen, 1995)*, 255–264, *Lecture Notes in Econom. and Math. Systems*, 448, *Springer, Berlin*, 1997. (*see* **97i:90009**) 90C29 (90C70)

Bilchev, S. *see* **Differential equations and applications, 97c:00039**

Bildik, Necdet A note on Dulac's problem for quadratic vector fields. IV. (English summary) *J. Inst. Math. Comput. Sci. Math. Ser.* **8** (1995), *no.* 3, 221–226. (Douglas S. Shafer) **97k:34066** 34C37 (34C05, 34C23, 58F21)

Biler, Piotr Exact estimates for the solutions to a class of homogeneous second order evolution equations. (English summary) *Appl. Anal.* **55** (1994), *no.* 1-2, 1–5. (Summary) **97a:34161** 34G20

— (*with* Nadzieja, T.) Growth and accretion of mass in an astrophysical model. II. (English summary) *Appl. Math. (Warsaw)* **23** (1995), *no.* 3, 351–361. (Herbert Koch) **97b:35110** 35K60 (35Q99, 82C21, 85A30)

— Local and global solutions of a nonlinear nonlocal parabolic problem. (English summary) *Nonlinear analysis and applications (Warsaw, 1994)*, 49–66, *GAKUTO Internat. Ser. Math. Sci. Appl.*, 7, *Gakkōtosho, Tokyo*, 1996. (Ya Zhe Chen) **97h:35081** 35K55

Biles, Daniel C. (*with* Spraker, John S.) A comparison of the Carathéodory and Filippov solution sets. (English summary) *J. Math. Anal. Appl.* **198** (1996), *no.* 2, 571–580. (Péter Tallós) **97a:34041** 34A60

— A technique for proving existence of solutions. *J. Math. Anal. Appl.* **206** (1997), *no.* 2, 589–605. (B. B. Pakholok) **97m:34006** 34A12 (34A45)

— (*with* Binding, Paul A.) On Carathéodory's conditions for the initial value problem. (English summary) *Proc. Amer. Math. Soc.* **125** (1997), *no.* 5, 1371–1376. (Michal Fečkan) **97g:34008** 34A12

Bilge, Ayşe Hümeyra Solution and ellipticity properties of the self-duality equations of Corrigan et al. in eight dimensions. (English summary) *Internat. J. Theoret. Phys.* **35** (1996), *no.* 12, 2507–2515. (R. S. Ward) **97m:53041** 53C07 (53C80, 81T13)

— Singular travelling wave solutions of the fifth-order KdV, Sawada-Kotera and Kaup equations. (English summary) *J. Phys. A* **29** (1996), *no.* 16, 4967–4975. (Summary) **97f:35181** 35Q53

Bilge, Ümit (*with* Ulusoy, Gündüz; Sivrikaya-Şerifoğlu, Funda) A genetic algorithm approach to the simultaneous scheduling of machines and automated guided vehicles. (English summary) *Comput. Oper. Res.* **24** (1997), *no.* 4, 335–351. 90B35 (90C35)

Bilgen, E. (*with* Zha, G.-C.) Numerical study of three-dimensional flows using unfactored upwind-relaxation sweeping algorithm. (English summary) *J. Comput. Phys.* **125** (1996), *no.* 2, 425–433. (Summary) **97a:76091** 76M20 (76L05)

Bilgen, Semih (*with* Deligönül, Z. Şeyda) Some applications involving solution of the Volterra integral equations of the second kind. (English summary) *Indust. Math.* **46** (1996), *no.* 1, 47–54. 45D05 (45L10)

Bilgin, Tunay On the statistical convergence. (English summary) *An. Univ. Timişoara Ser. Mat.-Inform.* **32** (1994), *no.* 1, 3–7. (Summary) **97g:40007** 40D25 (40A05)

— Note on strong A_0-summability. (English summary) *Bull. Fac. Sci. Ibaraki Univ. Ser. A No.* 28 (1996), 73–78. (K. Chandrasekhara Rao) **97j:40004** 40H05 (40C05, 46A45, 46B45)

— On strong A-summability defined by a modulus. (English summary) *Chinese J. Math.* **24** (1996), *no.* 2, 159–166. (Enno Kolk) **97k:40007** 40F05 (40D25, 46A45)

— Matrix transformations in some sequence spaces. (English and Turkish summaries) *J. Fac. Sci. Ege Univ. Fen. Fak. Derg. Ser. A-B* **19** (1996), *no.* 1, 1–6. (Summary) **97h:47020** 47B37 (40C05, 40H05, 46A45)

Bilinski, S. Die Familie der abgestumpften quasiregulären Polyeder. [The family of truncated quasiregular polyhedra] *Österreich. Akad. Wiss. Math.-Natur. Kl. Sitzungsber. II* **204** (1995), 145–150 (1996). (Johann Linhart) **97g:52037** 52B70 (52B10)

Biliotti, Mauro (*with* Johnson, Norman Lloyd[1]) Maximal Baer groups in translation planes and compatibility with homology groups. (English summary) *Geom. Dedicata* **59** (1996), *no.* 1, 65–101. (Rolando Pomareda) **97d:51003** 51A40 (51A10, 51A35, 51E20)

Billah, K. Y. R. (*with* Wu, M. M.; Shinozuka, M.) Analytical study of the Duffing oscillator excited by colored noise using a systematic adiabatic expansion. (English summary) *Trans. ASME J. Appl. Mech.* **63** (1996), *no.* 4, 1027–1032. (Summary) **97i:70040** 70L05

Billeke G., J. (*with* Wallace C., Myrna) Bifurcation of weakly forced Lienard equation of degree $2n$. (English summary) *Math. Notae* **37** (1993/94), 3–14. (Summary) **97c:34073** 34C23 (34A47)

— (*with* Sáez, Eduardo; Vásquez, Renato) About the generalized Hopf bifurcations at infinity for planar cubic systems. (English summary) *Rev. Colombiana Mat.* **29** (1995), *no.* 2, 89–93. (Summary) **97g:34054** 34C23 (58F14)

— (*with* Bobadilla, G.) Stochastic perturbation of a nonlinear oscillator. (English summary) *Rev. Mat. Apl.* **17** (1996), *no.* 1, 1–10. (V. A. Sobolev) **97a:34149** 34E15 (34C10, 34F05, 93E15)

Billera, Louis J. (*with* Sarangarajan, A.) All 0-1 polytopes are traveling salesman polytopes. (English summary) *Combinatorica* **16** (1996), *no.* 2, 175–188. (Alexander I. Barvinok) **97j:52016** 52B12 (05C45, 90C27)

Billett, S. J. (*with* Toro, E. F.) A unified Riemann-problem-based extension of the Warming-Beam and Lax-Wendroff schemes. (English summary) *IMA J. Numer. Anal.* **17** (1997), *no.* 1, 61–102. (Jian Guo Liu) **97m:76087** 76M20 (65M06, 76N99)

— (*with* Toro, E. F.) On WAF-type schemes for multidimensional hyperbolic conservation laws. (English summary) *J. Comput. Phys.* **130** (1997), *no.* 1, 1–24. (Summary) **97i:65148** 65M60 (65N30)

Billey, E. (*with* Avan, Jean; Babelon, Olivier) The Gervais-Neveu-Felder equation and the quantum Calogero-Moser systems. (English summary) *Comm. Math. Phys.* **178** (1996), *no.* 2, 281–299. (Andrey V. Tsiganov) **97f:81057** 81R50 (17B37, 81V70)

— (*with* Babelon, Olivier; Bernard, Denis) A quasi-Hopf algebra interpretation of quantum 3-j and 6-j symbols and difference equations. (English summary) *Phys. Lett. B* **375** (1996), *no.* 1-4, 89–97. (Jon R. Links) **97f:81058** 81R50 (16W30)

Billig, Yu. V. (*with* Pianzola, Arturo) Free groups of Lie type. (English summary) *C. R. Math. Rep. Acad. Sci. Canada* **18** (1996), *no.* 4, 159–162. (Vesselin Drensky) **97j:20027** 20E06 (16W25, 17B01, 17B60, 20F40)

Bolotin, V. V. ★ Stability problems in fracture mechanics. (English summary) Wiley Series in Nonlinear Science. A Wiley-Interscience Publication. *John Wiley & Sons, Inc., New York*, 1996. xii+188 *pp. ISBN* 0-471-12546-6 (Publisher's description) **97b:73077** 73M25 (73–01)

— (*with* Lebedev, V. L.) Analytical model of fatigue crack growth retardation due to overloading. (English summary) *Internat. J. Solids Structures* **33** (1996), *no.* 9, 1229–1242. (Summary) **97i:73082** 73M25

Bolotin, Yu. V. The generalized least squares method in the problem of estimation by angular measurements. (Russian. Russian summary) *Avtomat. i Telemekh.* **1997**, *no.* 2, 65–74. (Summary) **97m:93070** 93E10 (93E24)

Bolotnik, N. N. The motion of an absolutely rigid body on a hinge with two degrees of freedom in a uniform gravitational field. (Russian. Russian summary) *Prikl. Mat. Mekh.* **59** (1995), *no.* 6, 908–915; *translation in J. Appl. Math. Mech.* **59** (1995), *no.* 6, 865–872 (1996). (Mircea Lupu) **97b:70007** 70E15

Bolotnikov, Vladimir (*with* Alpay, Daniel; Loubaton, Ph.) On tangential H_2 interpolation with second order norm constraints. (English summary) *Integral Equations Operator Theory* **24** (1996), *no.* 2, 156–178. (Adolf A. Nudelman) **97d:47020** 47A57 (30D55, 30E05)

— On degenerate Hamburger moment problem and extensions of nonnegative Hankel block matrices. (English summary) *Integral Equations Operator Theory* **25** (1996), *no.* 3, 253–276. (Aurelian Gheondea) **97k:44011** 44A60 (47A57, 47B35)

— (*with* Alpay, Daniel; Dijksma, Aalt; de Snoo, Henk) On some operator colligations and associated reproducing kernel Pontryagin spaces. (English summary) *J. Funct. Anal.* **136** (1996), *no.* 1, 39–80. (Damir Z. Arov) **97a:47014** 47A48 (46C20, 46E22, 47A57, 47B50)

— (*with* Alpay, Daniel; Loubaton, Ph.) One two-sided residue interpolation for matrix-valued $\mathbf{H}_2$-functions with symmetries. (English summary) *J. Math. Anal. Appl.* **200** (1996), *no.* 1, 76–105. (Adolf A. Nudelman) **97e:47019** 47A57 (30D55, 30E05, 41A30, 46E99)

— (*with* Alpay, Daniel; Loubaton, Ph.) An interpolation problem with symmetry and related questions. (English summary) *Z. Anal. Anwendungen* **15** (1996), *no.* 1, 19–29. (Adolf A. Nudelman) **97d:47019** 47A57 (30E05)

Bolotnikov, Yu. V. (*with* Tarakanov, V. E.) Nonnegative matrices with zero permanent. (Russian. Russian summary) *Mat. Zametki* **58** (1995), *no.* 4, 493–504, 638; *translation in Math. Notes* **58** (1995), *no.* 3-4, 1021–1028 (1996). (S. Lajos) **97a:15033** 15A48 (15A15)

Bol'shakov, Yu. I. Linear operators that act in spaces with an indefinite scalar product. (Russian. Russian summary) *Mathematics at Yaroslavl' University (Russian)*, 21–29, *Yaroslav. Gos. Univ., Yaroslavl'*, 1996. (Yu. M. Arlinskiĭ) **97i:15006** 15A04 (47B50)

— (*with* van der Mee, Cornelis V. M.; Ran, André C. M.; Reichstein, Boris; Rodman, Leiba) Polar decompositions in finite-dimensional indefinite scalar product spaces: special cases and applications. (English summary) *Recent developments in operator theory and its applications (Winnipeg, MB, 1994)*, 61–94, *Oper. Theory Adv. Appl.*, 87, *Birkhäuser, Basel*, 1996. (Aad Dijksma) **97e:47053** 47B50 (15A23, 15A63, 47A05)

— (*with* van der Mee, Cornelis V. M.; Ran, André C. M.; Reichstein, Boris; Rodman, Leiba) Errata for: "Polar decompositions in finite-dimensional indefinite scalar product spaces: special cases and applications" [in *Recent developments in operator theory and its applications (Winnipeg, MB, 1994)*, 61–94, Birkhäuser, Basel, 1996; MR 97e:47053]. *Integral Equations Operator Theory* **27** (1997), *no.* 4, 497–501. 47B50 (15A23, 15A63, 47A05)

Bolsinov, A. V. (*with* Fomenko, A. T.) Unsolved problems and problems in the theory of the topological classification of integrable systems. (Russian) *Trudy Mat. Inst. Steklov.* **205** (1994), *Novye Rezul't. v Teor. Topol. Klassif. Integr. Sistem*, 18–31. (J. S. Joel) **97i:58002** 58–02 (58F05, 58F07)

— (*with* Fomenko, A. T.; Zhang, Xing Ru) The strong, semi-strong, and quasi-semi-strong bordism groups of integrable Hamiltonian systems of differential equations with two degrees of freedom. (English summary) *Russian J. Math. Phys.* **3** (1995), *no.* 4, 423–452. (Oleg M. Myasnichenko) **97d:58089** 58F07 (55N22, 57R75)

— (*with* Fomenko, A. T.) Application of classification theory for integrable Hamiltonian systems to geodesic flows on 2-sphere and 2-torus and to the description of the topological structure of momentum mapping near singular points. Dynamical systems, 1. *J. Math. Sci.* **78** (1996), *no.* 5, 542–555. (Gabriel P. Paternain) **97a:58144** 58F17 (58F05, 58F07)

— (*with* Dullin, Holger R.; Wittek, A.) Topology of energy surfaces and existence of transversal Poincaré sections. (English summary) *J. Phys. A* **29** (1996), *no.* 16, 4977–4985. (J. S. Joel) **97h:58073** 58F05 (70H05, 78A35)

Bolton, John (*with* Woodward, Lyndon M.) The affine Toda equations in the geometry of surfaces. (English summary) *Geometry and global analysis (Sendai, 1993)*, 175–189, *Tohoku Univ., Sendai*, 1993. (John C. Wood) **97c:58031** 58E20 (53C42, 58F07)

— (*with* Woodward, Lyndon M.) On harmonic 2-spheres in S^4. *Geometry and topology of submanifolds, VII (Leuven, 1994/Brussels, 1994)*, 88–91, *World Sci. Publishing, River Edge, NJ*, 1995. (*see* **97i:53001**) 58E20

Boltyanskiĭ, V. G. (*with* Morales Amaya, E.) Minimal fixing systems for convex bodies. (English summary) *J. Appl. Anal.* **1** (1995), *no.* 1, 1–11. (Bernd Kind) **97d:52016** 52A40 (52A20)

— An alternative model of the general relativity theory. (English summary) *J. Appl. Anal.* **1** (1995), *no.* 2, 109–123. (Summary) **97e:83075** 83D05

— Solution of the illumination problem for belt-bodies. (Russian. Russian summary) *Mat. Zametki* **58** (1995), *no.* 4, 505–511, 638; *translation in Math. Notes* **58** (1995), *no.* 3-4,

1029–1032 (1996). (Béla Uhrin) **97c:52003** 52A20 (52A35)

— (*with* Gohberg, Israel) Stories about covering and illuminating of convex bodies. (English summary) *Nieuw Arch. Wisk.* (4) **13** (1995), *no.* 1, 1–26. (Marek Lassak) **97g:52044** 52C17

— (*with* Martini, Horst) Combinatorial geometry of belt bodies. (English summary) *Results Math.* **28** (1995), *no.* 3-4, 224–249. (E. Hertel) **97e:52004** 52A37 (52A30)

— (*with* Martini, Horst) On maximal primitive fixing systems. (English summary) *Beiträge Algebra Geom.* **37** (1996), *no.* 1, 199–207. (Peter M. Gruber) **97d:52002** 52A20 (52A37)

— (*with* Martini, Horst; Soltan, P. S.) Star-shaped sets in normed spaces. (English summary) *Discrete Comput. Geom.* **15** (1996), *no.* 1, 63–71. (Marilyn Breen) **97c:52009** 52A30
